Project 1 – Create a Quiz

Create an array with 5 questions	10
Create an array with the 5 answers to the array questions. For simplicity, make each answer a single word.	10
Have a variable acting as a counter to keep track of correct answers	10
Present each question to the user thru a prompt	20
As each question is answered, check to see if the answer is correct or incorrect. Display a messages accordingly. If correct, add 1 to the counter	30
Once all questions are displayed and answered, display the total number of correct questions.	20
Total Points	100
